NGUYỄN THỊ TRÚC MAI VY

Product Designer · Multi-sided Platforms

Marketplace · Multi-role UX

End-to-end · Data-informed

Product Designer | Multi-role Systems, Real-time Service Flows, Conversion UX

SUMMARY

Product Designer with 4+ years designing digital products across multi-sided platforms - service booking, dual-sided eCommerce, and B2B. I focus on operationally complex systems where one action stays consistent across customer, provider, and admin touchpoints in real time. Comfortable working from behavioural data (GA4, Microsoft Clarity) and business requirements through to user flows, wireframes, and shipped hi-fi UI. Reads English product and research documentation fluently.

PROFESSIONAL EXPERIENCE

FULL-TIME EXPERIENCE

Bin Corporation Group Full-time 04/2025 – Present

One IBC · Offshore Company Corp · Client Portal

Two sister brands in the same corporate-services market - One IBC covers onshore company formation and compliance, Offshore Company Corp covers offshore jurisdictions - sharing one Client Portal where clients order services and track their filings.

Designed the website, mobile app and Client Portal UI end to end.

Mapped and simulated the full ordering journey - and walked stakeholders through it for sign-off, so structural decisions were settled before any Figma work began.

UI design across the group's other brands

- **UOM Global:** U.S. immigration advisory for investors, executives and families across Asia, covering EB-5, EB-3, L-1 and EB-1C pathways.
- **Airnoma:** Travel eSIM service: buy a data plan, install it, and get connectivity on arrival without a physical SIM.
- **SCDC Global:** Singapore-based engineering and construction firm spanning infrastructure, energy, data centres and industrial projects.
- **NTB Industrial Park:** Industrial park development in Da Nang, marketing land and ready-built factory space to manufacturing tenants.
- **BIN Media:** Vietnamese digital marketing agency running paid media (Facebook, Google, TikTok, Zalo), content production and events.
- **VoltoraX:** Clean energy technology brand: solar modules, battery storage, hybrid inverters and energy management systems.

Medpro Full-time 05/2023 – 04/2025

Website · App · Kiosk · Landing Pages

A medical booking platform: patients schedule hospital and clinic appointments online through the website or app, keep their records in one place to follow up between visits. A 24/7 care service also provides staff to accompany patients through the visit - used mostly by elderly patients and anyone unfamiliar with hospital procedures.

Designed the full service ecosystem end to end: four touchpoints serving three roles with conflicting priorities - speed for patients, throughput for doctors, control for hospital admins.

Took friction points directly from doctors and the operations team into the design, simplifying the steps patients owned without pushing manual work onto doctors' schedules.

CONCURRENT PART-TIME / CONTRACT EXPERIENCE

Tamvie Part-time 10/2025 – 03/2026

Website · App

A remote healthcare platform: patients consult doctors by video, sync readings from connected measuring devices and manage their appointments, alongside a community feed where users, doctors and specialists exchange questions and health knowledge. Parent-focused tools cover child growth tracking, vaccination schedules and nutrition guidance, and on the doctor side the platform handles patient management and administrative load so consultation time goes further.

Designed end-to-end flows across patient, doctor and admin roles, focused on operationally heavy workflows.

Freelance 2022 – Present

- Website and landing page UI across dermatology, volunteer, beauty & spa, visa services, education, exhibitions and eCommerce.
- Owned scoping, design and handoff directly with clients on fast-turnaround projects.
