EDUCATION

- HCMC University of Technology and Education
 - Bachelor of E-Commerce · 2019 - 2023
- Arena Multimedia
 - Digital Product Design · 2021 - 2023

ACHIEVEMENTS

- Employee of the Year
 - Medpro - Medical Booking (2024)
- Top Best Digital Product Design Projects in the First Half of 2023
 - Arena Multimedia (2023)
- Certification: The Fundamentals of Digital Marketing
 - 2023

SKILLS

- User Flow & IA
- Behavioural Data
- Wireframing
- AI Workflows
- Prototyping
- Conversion UX
- UI Design

TOOLS

Figma · Google Analytics 4 · Microsoft Clarity · ChatGPT / Claude

SELECTED SCOPE

- 14→4** B2B onboarding steps cut by deferring non-blockers
- 4** Real-time touchpoints kept in sync: web, app, kiosk
- 3** User roles balanced: customer, provider, admin

NGUYỄN THỊ TRÚC MAI VY

Product Designer · Multi-sided Platforms

Marketplace · Multi-role UX

End-to-end · Data-informed

Product Designer | Multi-role Systems, Real-time Service Flows, Conversion UX

SUMMARY

Product Designer with 4 years designing digital products (3+ years full-time) across multi-sided platforms — service booking, dual-sided eCommerce, and B2B. I focus on operationally complex systems where one action stays consistent across customer, provider, and admin touchpoints in real time. Comfortable working from behavioural data (GA4, Microsoft Clarity) and business requirements through to user flows, IA, wireframes, and shipped hi-fi UI. Reads English product and research documentation fluently.

CORE EXPERTISE

- Real-time Service Flows
- Information Architecture
- Conversion Optimization
- Multi-role System Design
- Design Systems
- Data-informed UX

PROFESSIONAL EXPERIENCE

FULL-TIME EXPERIENCE

Bin Corporation Group Full-time 04/2025 – Present

- Own end-to-end product design for web and mobile products across business formation, legal documentation, visa processing, eSIM activation, and B2B service platforms — serving both individual and corporate user segments.
- Rebuilt the B2B lead-capture and onboarding funnel from 14 steps to 4 by restructuring the information architecture and deferring non-blocking fields to post-signup, guided by GA4 and Clarity session data.
- Built and documented a reusable component library across web and mobile, standardising states, spacing, and dev handoff specs.
- Audited order-tracking and service-status flows using session recordings and heatmaps, then redesigned status communication so users could see where a request stood without contacting support.

Medpro Full-time 05/2023 – 04/2025

- Led product design across a 4-touchpoint service ecosystem — customer booking web and app, provider (doctor) operations app, on-site check-in kiosk, and acquisition landing pages — designing for 3 roles with conflicting priorities: speed for customers, throughput for providers, control for admins.
- Designed the full request lifecycle end to end: request → scheduling → confirmation → reschedule/cancel → on-site check-in. The core challenge was state propagation — a change made on one platform had to surface immediately and unambiguously on every downstream touchpoint.
- Booking carried a payer-vs-user tension: hospitals — the main channel — needed complete records, while each added field cost patient completion. Used Clarity heatmaps to identify which fields drove drop-off and moved non-essential ones out of the critical path.
- Balanced patient speed against provider control by taking friction points directly from doctors and the operations team into the design — simplifying the steps patients owned without adding manual work to doctors' schedules.

CONCURRENT PART-TIME / CONTRACT EXPERIENCE

Tamvie Part-time 10/2025 – 03/2026

- Designed end-to-end flows for a healthcare platform serving patients, doctors, and admins, focused on operationally heavy workflows.
- Kept design continuity across kiosk, mobile app, and provider portal so users could switch context without losing task state.

Eco - HHB Part-time 04/2024 – 12/2024

- Designed a dual-sided eCommerce marketplace serving end customers and B2B vendors — covering purchase flow, product listing management, and order fulfilment.
- Restructured the vendor experience so inventory and order status could be managed in parallel, cutting context-switching for merchants at peak hours.

Freelance Freelance 2022 – Present

- Conversion-focused landing pages and product UI for clients across beauty, dermatology, visa services, education, and medical equipment.
- Owned scoping, design, and handoff directly with clients on fast-turnaround projects.
