2021 - 2023

ACHIEVEMENTS

- Employee of the Year
Medpro - Medical Booking (2024)
- Top Best Digital Product Design Projects in the First Half of 2023
Arena Multimedia (2023)
- Certification: The Fundamentals of Digital Marketing
2023

SKILLS

- UX Research
- User Flow
- Prototyping
- UI Design
- UX Writing
- Analytics

TOOLS

SELECTED IMPACT

- ~30%** Reduced design-to-handoff time through design system standardization
- ~10%** Improved conversion & reduced 5% drop-off via UX audit & flow optimization
- ~8%** Increased lead conversion via IA, CTA, and form-flow improvements

NGUYỄN THỊ TRÚC MAI VY

Product Designer

Healthcare · B2B · eCommerce

End-to-end · Data-informed

Product Designer | Complex Flows, Healthcare Platforms, Conversion UX

SUMMARY

Product Designer with **3+ years of experience** designing complex web and mobile products across healthcare, B2B, eCommerce, and service platforms. Strong in **multi-role flows, information architecture, conversion-focused UX, and design systems**. Led end-to-end design across onboarding, booking, account, order, and admin experiences, partnering closely with product, business, and engineering teams to turn complex requirements into **clear, scalable, and measurable product outcomes**.

CORE EXPERTISE

- UX Strategy
- Information Architecture
- Conversion Optimization
- Multi-role System Design
- Design Systems
- Data-informed UX

PROFESSIONAL EXPERIENCE

FULL-TIME EXPERIENCE

Bin Corporation Group Full-time 04/2025 – Present

- Owned end-to-end product design for web and mobile products spanning business formation, legal documentation, visa processing, eSIM activation, and B2B service platforms - serving both individual and corporate user segments.
- Redesigned onboarding and lead capture flows for B2B clients, reducing the number of steps from 14 to 4 and improving form completion rate by approximately 8% - validated through GA4, Google Clarity.
- Established and documented a reusable component library covering core UI patterns across web/mobile, reducing average design-to-dev handoff time by ~30%
- Conducted UX audits on order tracking flows, identifying critical friction points. Subsequent redesign contributed to an estimated 10% uplift in conversion and 5% reduction in drop-off on booking appointment, tracked over 2 months post-launch.

Medpro Full-time 05/2023 – 04/2025

- Led product design across a 4-touchpoint healthcare ecosystem: patient-facing booking web & app, doctor workflow app, hospital check-in kiosk, and marketing landing pages - designing for 3 distinct user roles with different mental models and task priorities.
- Designed and iterated on 4 core service flows: appointment booking, video consultation scheduling, appointment management (rescheduling/cancellation), and cross-platform patient → doctor → kiosk handoff journeys - ensuring consistent task completion across all touchpoints.
- Applied heatmap analysis (Google Clarity) and click-tracking data to identify drop-off points in the appointment booking funnel. Redesigned booking appointment based on findings, improving form completion rate by an estimated 10% over 6 months.
- Maintained design consistency and operational logic across patient, doctor, and admin roles - ensuring that actions initiated on one platform (e.g. booking via web) propagated correctly to downstream touchpoints (doctor app, kiosk check-in).

CONCURRENT PART-TIME / CONTRACT EXPERIENCE

Tamvie Part-time 10/2025 – 03/2026

- Designed end-to-end product flows for a healthcare platform serving 3 user roles: patients, doctors, and admins - with emphasis on operationally complex workflows.
- Ensured cross-platform design continuity across kiosk, mobile app, and doctor portal - allowing users to switch contexts without losing task state or clarity.

Eco - HHB Part-time 04/2024 – 12/2024

- Designed a dual-sided e-Commerce platform supporting both end customers and B2B vendors/suppliers - covering purchase flows, product listing management, and order fulfillment workflows.
- Redesigned multi-role commerce journeys to reduce context-switching friction for vendor users managing inventory and order status simultaneously.

Freelance Freelance 2022 – Present

- Designed conversion-focused landing pages for clients across beauty, dermatology, visa services, education, and medical equipment sectors.
- Delivered adaptable UI solutions across industries and fast-moving projects.
